EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nora Stein on September 3, 2009.

The application has been amended as follows:

Delete claim 1 and insert new claim 1 as follows:

--An oral appliance cleanser composition comprising:

a) a cleansing component comprising:

i) a bleaching agent,

ii) a surfactant,

iii) a sequestering/chelating agent selected from the group consisting of sodium polyphosphate and ethylenediamine tetraacetic acid, and

b) a sensory signal component providing a sensory signal of sufficient intensity and duration that the consumer perceives the sensory signal to indicate the commencement or cessation of the cleansing action, wherein the sensory signal component is a gasified candy comprising:

i) at least one sugar selected from the group consisting of glucose, fructose, sucrose and lactose,

ii) corn syrup,

iii) optionally a sugar substitute, and

iv) a gas that is unreactive with the sugar or sugar substitute.—

In line 1 of claim 11, delete "10" and insert —1—therefor

In line 1 of claim 12, delete "10" and insert —1—therefor

In line 2 of claim 12, delete "surfactant, sequestering/chelating agent, an"

In line 1 of claim 15, delete "12" and insert —1—therefor

2. The following is an examiner's statement of reasons for allowance: Applicants have claimed an oral appliance cleanser according to present claim 1. The prior art is replete with denture cleaners, toothpastes, and tooth powders that have an effervescent action. This is almost always provided by an effervescent system comprising a carbonate and citric acid, where the gas is produced by chemical reaction, or the gas is physically entrained somehow within the composition. These cleaners may also have typical ingredients such as bleaches, surfactants, and flavorants. Critically however, with respect to this application, the cleaners do not include a gasified candy. In fact, for

obvious reasons, the prior art teaches away from incorporating candy into a dentifrice, as very often candy is the very substance the dentifrice is seeking to remove or counteract. The examiner would like to state very clearly for the record that a careful distinction is being drawn here between flavored effervescent denture tablets or toothpastes, for example, and a gasified candy. A denture tablet, toothpaste, or tooth powder, however flavored, could never be mistaken for candy made up of sugar and corn syrup. That said, it would not have been obvious to one of ordinary skill in the art to incorporate a candy into an oral appliance cleaner. Looking at this from the other direction, one of ordinary skill in the art would not incorporate a bleach, surfactant, and chelant into a candy. The two components, the cleaner and the candy, are simply incompatible. That is, until applicants' discovery that a gasified candy provides a superior sensory signal for an oral appliance cleaner. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles I. Boyer whose telephone number is 571 272 1311. The examiner can normally be reached on M-Th 9:30 to 6:00.
